

Do you want a chance to play with a social robot?

“ Practicing with the robot can let children have more fun and achieve a better performance level. ”

Hi, we are the design researchers at TU/e. We are doing a Design Research Project to find out how to design the social robot to benefit children instrument practicing.

We sincerely invite your child to participate in our research. Scan the QR code or click the link <https://forms.gle/e7yytc4g7qufHFkw8> to find more information and gain a FREE chance to practice with a robot!

If you have any questions regarding this experiment please contact h.song@tue.nl.
